- (C) None of these
- Cooking facilities:** (A) Stove/hot plate/burner and kettle, pots & pans
- (B) Stove/Hot plate/burner or kettle, pots & pans
- (C) None of these

Basic Trail Description

The nature reserve comprises 4000 hectares of rolling Bankenveld grassland, with a number of wetlands and two dams, one being the large Rietvlei dam. It is fully fenced with security gate at the entrance. It is being used extensively for environmental education programmes. There are an extensive list of birds and 1 500 head of game.

The network of trails covers the whole area. Trails of various distances can thus be used. The trails are guided but self-catering and all equipment has to be carried by the hiker. Various cultural and natural features occur along the trail.

Trail Facilities & Safety

- Booking facilities and information:** Internet, postal, telephone & fax
- Reception office:** On site
- Road signs:** Clear road signs to start
- Access road:** Last section tar
- Parking:** Some shade trees
- Trail Format:** Circular
- Map:** Generalized map
- Brochure:** General basic information on trail and environment
- Markers:** None. Guided
- Environmental education:** Informative
- Safety:**
 - Accommodation:* Safe
 - Warning signs:* Dangerous places marked
 - Crossings:* Safe and effective river/road crossing
 - Telephone:* At start and end of trail
 - Medical Aid:* Basic aid near start and end of trail
 - Hikers' safety en route:* Safe
 - Water:* None *en route*
 - Parking:* Safe from public areas/veld fires

Environmental Character: Definitions

A **PRISTINE** environment depicts an area where nature still exists in its more-or-less pure form: clean drinking water in streams, indigenous vegetation and animal life with no trace of human constructions, activities or sounds nearby

In a **NATURAL** environment one could expect to see and hear human activities to a limited extent; such as e.g. associated with farming and forestry. Exotic plants (e.g. pine plantations) might be prevalent; as well as cattle, fences and constructions such as earth dams.

To hike through a **RURAL** environment would imply close contact with rural development and its associated noise, crossing of public roads, hiking on forestry/ farm roads, visual contact with agricultural fields, cement dams, domesticated animals, etc.

A **SEMI-URBAN** environment will be typically an urban green belt or city park or similar where the built environment is adjacent to the trail and where the noise of vehicles and associated aspects of pollution will often be prominent.

Generalized Classification

 41% Pristine
